EDUCATION

ELECTRONICS TELECOMMUNICATION ENGINEERING

HANOI UNIVERSITY OF SCIENCE AND TECHNOLOGY | 09/2016 - 09/2023

PROJECTS

CAR-RENTAL WEBSITE

04/2023 - present

The project focuses on designing and building an online car-rental website with a user interface along with a simple system management.

The main function of the website is to help users book a car in the most convenient and easy way. The website has a registration and login feature, after logging in, users can choose the car that meets their needs and book a rental simply after a few clicks. In addition, users can register to become car owners, upload vehicle details to the website for rental. Vehicle owners can edit information, post photos and control the condition of their vehicle.

Front-end using Vuejs,

Backend using Fastapi

and DataBase using MongoDB.
